

# Energy Saving Projects Funnel Created

(Leading Heavy Equipment Manufacturer (Odisha))

## Challenges:

Before TMS –

- Monthly Energy Cost was too high
- The management team was serious about the reduction of the plant running costs.

## Approaches :

Tetrahedron Energy auditor team delivered training on Energy Management System (EMS) to the plant staff and operator level. In addition, 4 Energy Auditors conducted a Level 3 energy audit across the plant and presented the Energy Management Opportunities (EMO)s to the plant management team and identified energy savings projects for the energy team.

## Results :

- Developed an internal energy auditing and management team including 3 Management persons, 5 technical Staff & 10 technicians.
- **65 Energy Savings Project Funnel created**
